## **DETAILED ACTION**

### ***Terminal Disclaimer***

The terminal disclaimer filed on 21 December disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent No. 6,935,224 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over KR 2002-0057012 in view of WO 01/73164.

There is disclosed in the Korean reference a bread maker, comprising: an oven compartment 10; a pair of rotatable kneading drums 11, 13; a baking tray 15, comprising first and second L-shaped tray members 15a, 15b; a pair of dough-blocking members 17; a heater 18; a door 3; a rotation sensor 30, 41; a driving part 25; and a control part 70.

WO 01/73164 discloses that it is old and well known in the art to place a ceramic layer on a food support surface of a cooking vessel.

Art Unit: 1761

It would have been obvious to one skilled in the art to provide the tray of KR 2002-0057012 with a ceramic layer as disclosed in WO 01/73164, for the purpose of preventing damage to the tray by food or cooking chemicals sticking thereto.
